

**REMARKS**

Support for the amendment to claim 10 can be found throughout the specification as filed, particularly at page 29, beginning at line 17, where methods of making and using heavy chain antibodies, such as camelid antibodies, heavy chain disease antibodies and variable heavy chain immunoglobulins are described, and at page 44, beginning at line 16, where methods of treating schizophrenia with an antibody, including a heavy chain antibody, are set forth. Thus, the present amendments add no new matter.

Favorable examination of the claims on the merits is respectfully requested.

Respectfully submitted,

Boris Skurkovich *et al.*
